

Meagan McCarthy, M.D.

Knee Prepatellar Bursectomy

Goals:

- Reduce pain/swelling (ice 3x's daily for 15-20 minutes directly on knee)
- Full knee ROM to start 10 days after surgery
- Full weight bearing as tolerated in brace locked in extension

0-2 weeks post op

- Modalities as needed
- Leg in full extension at all times to allow for wound healing from the bursectomy
- OK to do quad sets with leg in full extension
- Brace locked in full extension when ambulating

3 weeks post op

- Discontinue brace, ok to flex/extend knee as tolerates
- Modalities as needed
- Stationary bike with high seat if needed and lower it to normal height when able
- Quad sets/SLR
- Chair Squats/Wall squats - keep tibia perpendicular to floor
- Open/Closed chain ex's (leg extensions, leg curls, leg press etc)
- Step Ups - start with comfortable height and progress to normal step height as able
- Stairmaster, Versa climber, general cardio. Equipment
-

5 weeks post op

- Cont. as above
- May begin running if knee is not swollen or painful
- Plyometrics if needed

Return to Sport

- When cleared by physician
- No pain/swelling
- Full ROM
